

PIMI advertisement Pricing & Sampler Pages (Advertisements references)

PIMI.IR Table of Advert Price Base

This sampler shows you images of what has been explained for the positions of advertisements on the related table and also the estimated (and not net) prices:

1- Row 01 in the table: This is the "ONLY ONE" and not repeatable position of an advertisement at the heart of PIMI website

PIMI Home Page
position

The ONLY CORE advertisement

The price for this advert is Euro 5000 per year

Extra benefits which adds to the value of this special advert are: A) Publication of the same ad (different size due to different structure of our [Farsi website](#) ; B) Links at both websites to customers' desired links; C) 1 PR per month (max. 500 words) at PIMI.IR and its Farsi translation, all with desired linking (no translation cost), Local support for those who want more info via Farsi comments. D) We will do our best that your customers find you simply, if your products/services are desirable for them.

2- Row 02 in the table: This is a special offer for those customers who wish to pay the least possible but to benefit more. According to this advert plan, either we will make a Qr Code which only directs the Code to your website, or we can receive a Qr Code designed by your artists and we will publish it at the QRCode's page of PIMI. Benefits: A) The same Code will be published at our Farsi website with link to your website; B) Your company name will be indexed at both sides; C) We will do our best that your customers find you simply, if your products/services are desirable for them.

General view of main section page

Focusing on the target "Qr Codes" rectangular section and, what will happen, and what the viewers will see!

Row 03 - 09 in the table: All price bases and positions mentioned at the price table, corresponds to the positions showing at the next 3 cropped images of the PIMI home page. Advertisements at top of main news column and the right position of this column have been given most fair prices because of its position importance:

PIMI Home Page, 1st Scrolled page (2nd half)

An image of the top adverts (Rows 03 of the table)

An image of the RIGHT Side adverts' Position (Rows 03 - 09 of the table)

Rows 10 - 13 of the Pricing Table: This section covers all areas above the FOOTER area of PIMI.IR home page. This area could expand to all pages; which means; One customer may ask its adverts to be shown at all pages. When the price will be higher, but we know that there should also been a considerable amount of discount (negotiable).

Rows 14- 16 of the Pricing Table: Apparently, any viewer of this website which picks up a news to read, either goes directly to the same news title's page, or goes to the "News Category" of the same title. These are almost the same value pages for advertisements. When someone is reading the news, or the news-headlines, can't see the adverts in the sidebar. So, the advertisements at these pages have their special values and so a little more tariffs. The sample pages are as of the following images:

World events: ESCAP holds its regional meeting in Tehran

Polymer Industry Media International

a publication of plastic industry magazine

HOME EVENTS JOBS CAREER 2016 NEWS BUSINESS DIRECTORY TRADE SHOWS POSTAL SERVICES LOG IN/REGISTER

PM&T, Tehran: In an one hour [01:30-02:00- Dec. 22nd] live interview broadcasted from IRINN [Channel 8 of IRIB], Dr Rajab Saloroo, director of Iran-Russia Contemporary Study Centre, defended many Russians under the questions actions, also predicted a very bright future for two countries' relations.

Since, PIMI has not received the necessary permission from IRIB, so we just sum into highlights of his words:

- The international banking flow will be diverted towards Russia and the west will lose;
- Iran and Russia are trying to decrease the amount of agricultural taxes between the two countries;
- The visa regulations between the two countries are modified and the businessmen will travel to each others' countries easily;
- The S300 portal is old and Russia will supply its modern version to Iran and may be will deliver S400;
- The previous power plant problems will not be repeated. It belonged to previous Russian and we were dependent to 1000 companies narrated
